

Publish program on Windows Task Scheduler as Job

1-open start menu and type “Task Scheduler”

2-From Actions Side Menu Select “Create Task”

The image shows the 'Create Task' dialog box in Windows Task Scheduler. The 'General' tab is selected. The 'Name' field is empty. The 'Location' field contains a backslash '\'. The 'Author' field contains 'BARIEQTECH\aabdelatif'. The 'Description' field is empty. In the 'Security options' section, the text 'When running the task, use the following user account:' is followed by a text box containing 'BARIEQTECH\aabdelatif' and a 'Change User or Group...' button. Below this, there are three radio buttons: 'Run only when user is logged on' (selected), 'Run whether user is logged on or not', and 'Do not store password. The task will only have access to local computer resources.' (disabled). There are also two checkboxes: 'Run with highest privileges' (unchecked) and 'Hidden' (unchecked). At the bottom, the 'Configure for:' dropdown menu is set to 'Windows Vista™, Windows Server™ 2008'. The 'OK' and 'Cancel' buttons are at the bottom right.

Create Task

General Triggers Actions Conditions Settings

Name:

Location: \

Author: BARIEQTECH\aabdelatif

Description:

Security options
